By 2025, the U.S. could see a shortage of as many as 31,100 primary care physicians. Even if nurse practitioners and physician assistants are fully utilized, patient needs will not fully be met. South Carolina has 103 designated HPSAs and only 69% of the primary care needs in those areas are currently being met. There are 4,750 highly trained pharmacists in SC who are ready to provide valuable healthcare services.

South Carolina's Pharmacists: Improving People's Health

Meeting Patients' Needs in South Carolina

- 5.02 million people need more primary care providers
- 232 more primary care providers are needed
- 4,750 Pharmacists ready to help

Diabetes

Diabetes is a complex condition that is often managed by multiple medications. Pharmacists can optimize care and help patients understand their medications and their condition in order to improve outcomes and avoid complications.

Cardiovascular Disease (CVD)

For patients with uncontrolled high blood pressure, waiting even two months to optimize medications increases the risk of complications, including hospitalizations. Pharmacists are highly accessible members of the care team who significantly improve blood pressure control and can provide timely follow-up and monitoring to improve outcomes.

Immunization rates across the U.S. have continued to increase since pharmacists began vaccinating.

Medications are critical for the treatment of chronic conditions. Pharmacists can help patients use them safely and effectively to avoid medication related problems.

Smoking causes nearly 1 of every 5 deaths in the U.S. each year. Pharmacists are qualified and capable of providing smoking cessation counseling.
Investing in pharmacists’ services optimizes the use of those prescription medications. Decades of research have proven the value of including pharmacists on healthcare teams. Improved health outcomes, lower costs, and increased access to care could be a reality for South Carolina residents if pharmacists were fully empowered to serve as patient care providers.

Healthcare $$ Spent on Chronic Conditions

On average $1,000 per patient per year is saved with pharmacist interventions for patients with chronic conditions.\textsuperscript{17}

Pharmacists’ counseling and adherence programs can save the healthcare system $164 per patient in the 6 months following the start of a new prescription medication.\textsuperscript{18}

75% of South Carolina hospitals were penalized for high readmission rates.\textsuperscript{19}

South Carolina spent $1.8 billion on Medicaid in 2016.\textsuperscript{22}

Patients are 2X more likely to stay out of the hospital when pharmacists provide clinical services after discharge.\textsuperscript{20}

Pharmacists in Ohio delivered a 4.4:1 ROI when providing medication therapy management services to Medicaid patients. South Carolina pharmacists could do this too!\textsuperscript{21}

$4.40 saved per $1 spent on pharmacists’ services
